I am an experienced MERN stack developer with a strong understanding of MongoDB, Express, React, and Node.js. I excel at developing full-stack web applications using JavaScript, HTML, CSS, and Git. With my attention to detail and passion for collaboration, I consistently deliver high-quality software solutions that meet business requirements and enhance the user experience.

Work Experience

MERN Stack Developer

Hashloops Technologies - Lahore

September 2022 to Present

- Spearheaded the development of a comprehensive CRM and LMS system using the MERN stack (MongoDB, Express.js, React.js, Node.js) to enhance client relationship management and learning management capabilities.
- Leveraged Next.js for optimized server-side rendering, ensuring a seamless and efficient user experience in the web applications.
- Engineered AI negotiation features, integrating OpenAI technologies to enhance automated negotiation processes, showcasing adaptability in cutting-edge technologies.
- Proficiently utilized TypeScript to enhance code quality, readability, and maintainability in the development workflow.
- Collaborated with cross-functional teams to analyze requirements, design solutions, and implement features, contributing to a dynamic and collaborative work environment.
- Successfully delivered high-quality software solutions within specified timelines, demonstrating strong project management and execution skills.

Mern Stack Developer

Ai Networks pvt ltd - Lahore

October 2021 to September 2022

- Integrated secure payment solutions seamlessly into the School Management System using the MERN stack, Node.js, Express.js, React.js, and PostgreSQL, ensuring a smooth financial transaction process for tuition fees and related payments.
- Implemented DevOps practices, including version control using GitHub and deployment on the Azure platform, optimizing the development workflow for both the School Management System and STEAM PAKISTAN initiative.
- Played a key role in the end-to-end development lifecycle of the School Management System, from requirement analysis to deployment, ensuring a secure and reliable payment module.
- Collaborated closely with stakeholders in both projects to understand their specific requirements and deliver tailored solutions, emphasizing the importance of technology in enhancing education and accessibility.

Front end developer

Vvork Cloud technologies - Lahore

April 2020 to October 2021

- Joined Vvork Cloud Technologies as a Front-End Developer, leveraging HTML, CSS, and JavaScript to enhance user interfaces.
- Actively contributed to project success in a dynamic software house environment, gaining valuable experience in collaborative development.
- Demonstrated adaptability and commitment to growth by progressing from a Front-End Developer role to completing an internship.
- Engaged in continuous learning, staying updated on industry trends and incorporating new technologies for improved web application quality.
